Mindset Check-In

Mathematics

You've been asked to teach a new subject.
What are your first thoughts?

Thinking about this subject, what are you excited about?
Think: who you're teaching, who you're teaching with, specific content. Anything.

What, if anything, are you anxious about? **Is there something you could do?**

Thinking about this upcoming year...
What positively framed goals do you have for yourself?

Teaching Methodology

Mathematics

What is the problem-based teaching approach in Maths?

What are the benefits of teaching this way?

How does this look in my classroom?

Notes!

Reflections

Any thoughts on Mathematics assessments?
